

Create asp.net web-site based on the Web-Forms technology from scratch with the following logic:

1. Web-site should act as simple CMS. Admin user can create any number of contents, which could be seen by users after that.
2. Necessary to create admin part with possibility to manage unlimited number of contents.
3. Necessary to create front-end part with possibility to view unlimited number of contents.

Admin page: **/Admin**

Username: **Oleg**

Password: **qwerty~**
